New interventions

LCC_2023_179 Nurturing children's health together: A collaboration between parents and early childhood education and care educators on active play and eating well (Playful Bytes)

The aim of Playful Bytes is to co-develop strategies and resources to support educator-parent engagement around children's eating and physical activity, with early childhood education and care (ECEC) educators and stakeholders, and parents. A key focus of the project is co-designing strategies and resources that best support the needs of parents and ECEC services and educators in disadvantaged Western Australia communities, including those in regional-remote areas of the state.

LCC_2023_181 Self-care of Multimorbidity in schizophrenia supported by Peer workers: a Co-designed health Information Technology (SiMPLiCiTy)

This program aims to address the critical issue of multimorbidity for people with schizophrenia spectrum diagnoses. Key focus will be to improve the standard of physical health screening and self-care offered in mental health services; co-produce digital technologies that are aligned with people's needs and real-world mental health services; and grow the peer workforce's capabilities to respond to the physical health needs of people with schizophrenia.
